

# Flo™ Monitor Arm

## Just one touch—you'll feel the difference

Smooth. Light. Effortless. Creating a health-positive working environment has never been so simple. With few parts but unbeatable performance, Flo takes dynamic monitor arms in a healthier direction.

Geometric Spring System

### Put a spring in your touch

Unlike other solutions that use mechanical springs that are cumbersome and time consuming to adjust, Flo uses a patented geometric spring technology that is simple to adjust and delivers a greater range of articulation than any other monitor arm in its class. Up and down, in and out—Flo moves effortlessly where you need it. No tools. Just fingertips.

Counter Balance Indicator

### Installs fast

The quick-connect VESA bracket makes installing the monitor fast. A single counter-balance adjustment and the visual weight indicator let you adjust tension to the optimal setting—and then quickly dial in to the proper number when installing monitors in multiple workstations.

### Future-proof the workplace

The combination of Flo's significant vertical adjustment range and its -40 degree rearward tilt makes Flo the ideal solution for touch-screen technology and people with progressive lenses.

### Specifications:

#### Technical Specifications:

- Maximum monitor weight: 20 lbs
- Vertical Adjustment: 13.3"
- Focal Adjustment: 20.6"
- Tilt Range: - 40° rearward; 40° forward
